SUPPLEMENT TO 25X1X
REPORT NO.

1. The "Vadasztohteny és gyutacsarugyar N.V." in Szekesfehervar is the site of the most important Hungarian ammunition and shell factory. It employs 4,500 workers in three shifts (each shift takes over the tools and the machines from the previous shifts so that there is no stoppage of slow-down of work).
2. Explosive powder, shells, and heads of anti-aircraft shells are manufactured here. The best machines from Csepel and from Russia are immediately sent to this factory.
3. Prisoners who have received sentences for minor offenses are among those employed in this factory.
